

TeamSync

SUMMARY

TeamSync should feel like a modern startup product built in 2026. The interface should combine Linear's speed, Notion's workspace organization, GitHub's activity transparency, Vercel's polish, and Mastra's futuristic visual identity. The application should never resemble a traditional admin dashboard. Users should feel they are operating inside a collaborative workspace rather than viewing static CRUD pages.

VERSION

1.0

CORE DESIGN PRINCIPLES

1. Workspace First: Projects and tasks are the center of the product. Everything should revolve around active work. Avoid dashboard-first design. 2. Focus Over Density: Show only relevant information. Avoid overwhelming users with metrics. 3. Motion With Purpose: Every animation should communicate state changes. Avoid decorative motion. 4. Collaboration Visibility: Users should always know who is working, what changed, what is blocked, and what is completed. 5. Premium Product Feel: Every interaction should feel intentional. No default Material UI appearance.

DESIGN REFERENCES

Primary References: Mastra, Vercel, Linear Secondary References: Notion, GitHub, Raycast Avoid References: Traditional Admin Templates, Bootstrap Dashboards, Legacy Enterprise Software

VISUAL STYLE

Design Language: Neo-SaaS Characteristics: Dark-first, Spatial depth, Layered surfaces, Ambient lighting, Premium typography, Minimal clutter, Intelligent whitespace

COLOR SYSTEM

Primary Background: #050816 Secondary Background: #0B1220 Workspace Surface: #111827 Elevated Surface: #172033 Border: #23304A Primary Accent: #7C3AED Secondary Accent: #8B5CF6 Success: #22C55E Warning: #F59E0B Danger: #EF4444 Info: #38BDF8

TYPOGRAPHY

Display Font: Satoshi UI Font: Inter Heading Scale: H1 48px, H2 36px, H3 28px, H4 22px Body: 16px Caption: 13px

3D DESIGN SYSTEM

Purpose: Use 3D only where it improves perception. Never use 3D inside task management workflows. Allowed 3D Areas: Landing Hero, Project Analytics, Empty States, Onboarding, Team Network Visualization, Project Health Visualization Forbidden Areas: Forms, Tables, Task Editing, Comments, Kanban Interaction, Notifications

LANDING PAGE

Hero Section: Large 3D workspace visualization. Components: Floating task cards, Team avatars, Connection lines, Project nodes, Ambient particles Technology: React Three Fiber Purpose: Immediately communicate collaboration.

DASHBOARD DESIGN

Layout: Three Panel Structure Left Rail: Navigation Center Workspace: Primary Content Right Context Panel: Activity Feed, Notifications, Insights

LEFT RAIL

Collapsed Width: 72px Expanded Width: 260px Sections: Dashboard, Projects, Tasks, Team, Analytics, Settings Create Button: Persistent, Always Visible

TOP COMMAND BAR

Contains: Global Search, Quick Create, Notifications, Profile, AI Assistant Entry Keyboard Shortcut: CTRL + K

DASHBOARD

Not card-based. Instead use modular widgets. Sections: Today's Focus, Upcoming Deadlines, Project Health, Recent Activity, Assigned Tasks, Team Status

PROJECT WORKSPACE

Most Important Screen Layout: Header, Project Overview Workspace Tabs: Board, List, Timeline, Files, Activity Context Panel: Members, Deadlines, Quick Actions

TASK BOARD

Primary View: Kanban Columns: Backlog, Todo, In Progress, Review, Done Interactions: Drag and Drop, Animated Movement, Instant Persistence

TASK DETAIL PANEL

Slide-over Drawer, Opens From Right Contains: Task Information, Comments, Attachments, Activity Timeline, Related Tasks, Subtasks

ACTIVITY FEED

Inspired By GitHub Shows: Task Assigned, Task Completed, Comments Added, Files Uploaded, Members Joined Each Activity Includes: Avatar, Action, Timestamp, Related Entity

TEAM VISUALIZATION

Unique Feature: Interactive Team Network 3D Visualization Shows: Projects, Members, Tasks, Relationships Purpose: Team collaboration overview.

ANALYTICS EXPERIENCE

Avoid Traditional Charts Use: Project Health Rings, Velocity Indicators, Progress Timelines, Workload Maps, Completion Trends 3D Elements Allowed Here

MOTION SYSTEM

Library: Framer Motion Timing: 150ms-250ms Animations: Fade, Scale, Slide, Depth Shift, Opacity Avoid: Bounce, Elastic Motion, Long Transitions

GLASS EFFECTS

Limited Usage Allowed: Command Palette, Search Modal, Notifications Panel, AI Assistant Blur: 8px-12px Opacity: 85%-90%

MOBILE EXPERIENCE

Bottom Navigation: Dashboard, Projects, Tasks, Notifications, Profile Task Detail: Bottom Sheet instead of Modal

EMPTY STATES

Premium Illustrations, 3D Objects Examples: No Projects - Floating Project Orb; No Tasks - Floating Task Stack; No Activity - Connection Network Illustration

ACCESSIBILITY

WCAG AA Keyboard Navigation: Required High Contrast Mode: Supported Reduced Motion: Supported

COMPONENT LIBRARY

Buttons: Rounded Large Cards: Border-Based Inputs: Soft Surfaces Badges: Minimal Dropdowns: Floating Panels
Modals: Glass Panels Drawers: Primary Interaction Pattern

OVERALL EXPERIENCE

The final product should feel like: 50% Linear, 20% Notion, 15% Vercel, 10% Mastra, 5% GitHub. The application should look premium and futuristic while remaining highly usable for daily team collaboration.
